

SUMMARY

A highly motivated and detail-oriented graduate with a solid understanding of Python programming, software testing techniques. Eager to apply my skills in Python test automation and contribute to quality assurance processes. Looking for an opportunity to grow and develop as a Python Tester.

SKILLS

- Programming Languages: Python, SQL, JavaScript
- Testing Frameworks: PyTest, UnitTest, Selenium
- Version Control: Git, GitHub
- Databases: MySQL, PostgreSQL, MongoDB
- Basic knowledge of AWS.
- Django, Flask frameworks.

INTERPERSONAL SKILLS

Critical thinking, self management and coordination, decision making and analytical skills.

Interest and Hobbies

Reading books| Writing|
Gaming| Travelling

Languages Known

English| Hindi| Punjabi

EDUCATION

Bachelor of Technology in Computer Science Engineering | Chandigarh Group of Colleges, Landran
Session:2020-2024| Cgpa: 7.33 cgpa
Intermediate(PSEB)|Government Senior Secondary Smart School, Lalru
Session: 2019-2020 | Percentage: 89%
Matriculation (CBSE) | St.Joseph school, Ambala
Session: 2017-2018 | Percentage: 74%

TRAINING

Solitiare Infosys | Python

Completed a comprehensive course in python, focusing on foundational programming concepts, data structures, algorithms and libraries.

Gained hands on experience in scripting, data manipulation and automation.

PROJECTS

1. Library Management System | Developer

Languages/Database: Python, Mysql A college library management is a project that manages and store books information electronically according to students needs. The system helps both students and library manager to keep a constant track of all the books available in the library.

2. Weather App using API

Developed a Python-based web application that fetches real-time weather data from the OpenWeatherMap API. The app allows users to input a city name and receive current weather conditions, including temperature, humidity, wind speed, and weather descriptions.

3. Face Recognition System It works by identifying and measuring facial features in an image. Facial recognition can identify human faces in images or videos, determine if the face in two images belongs to the same person, or search for a face among a large collection of existing images.
